MIXTAPE 2.0 : CIMIO

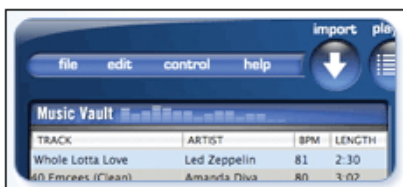

MIX TAPE 2.0: CIMIO

Conceived by the peeps at [SCRATCH DJ ACADEMY](#)

Listen up Sparky, if you've always wanted to create a DJ mix of your favorite tunes but the thought of learning how to DJ and spending 3 or 4 Benjamins on software has kept you discouraged, then Cimio will rock your world.

Conceived by the peeps at Scratch DJ Academy, Cimio is a simple automated DJ app, downloadable for only \$29.95 that is simple to use and makes your DJ wishes come true. Here's how it works, in three simple steps.

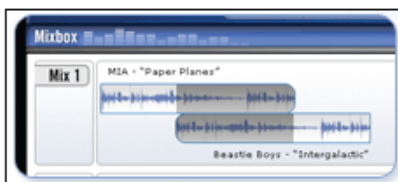

1. Import your favorite songs into Cimio, the software then detects BPM, Bars and Beats and recommends tracks that will have a good chance of blending well together

2. Next you create a play list from Cimios suggestions with a simple click and drag

3. You can preview the transitions between songs and set how any bars you want during the transitions

That's it; hit Play and Cimio will then DJ your play list automatically. Of course you wouldn't use this app to DJ a club set but then again, it wasn't really created for Club DJ's, it was created for non DJ's who want to create party mixes, mixes to enjoy in the car, share with friends or to take to the gym. It's compatible with MP3, AAC, MP4, and WAV formats and will satiate your need for continuous mixed playback of your music.
